

Carbon Reduction Plan

Supplier name: **PromeX Ltd**

Publication date: **April 2024**

Commitment to achieving Net Zero

PromeX Ltd is committed to achieving Net Zero emissions by 2050.

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 1st Jan 2023 to 31st Dec 2023

Additional Details relating to the Baseline Emissions calculations.

2023 has been used as a Baseline year as implementation of CRP had been disrupted due to Covid 19.

Gathered data for Scopes 1 to 3 has an element of assumptions but work will continue to capture more accurate data going forward and CRP will be monitored and updated regularly.

We have identified and nominated a person within the Business that will take on the task of achieving our Net Zero targets as well as implementation of any improvements identified within the business.

Scope 3 only contains Employee commuting and business travel at present, but more detail will be added as the CBR is developed

Baseline year emissions:

EMISSIONS	TOTAL (tCO₂e)
Scope 1	9.8
Scope 2	29.0
Scope 3 (Included Sources)	25.9
Total Emissions	64.7

Current Emissions Reporting

Reporting Year: 1 st Jan 2023 to 31 st Dec 2023	
EMISSIONS	TOTAL (tCO ₂ e)
Scope 1	9.8 (Same as Baseline due to 1 st reporting year)
Scope 2	29.0 (Same as Baseline due to 1 st reporting year)
Scope 3 (Included Sources)	25.9 (Same as Baseline due to 1 st reporting year)
Total Emissions	64.7

Emissions reduction targets

To progress to Net Zero, we have identified the below.

- Improved awareness within the workplace
- Office equipment to be switched off out of business hours where possible.
- Shop Floor Equipment to be switched off out of business hours where possible and viable.

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets.

- LED Lighting throughout
- Sensor lighting in hallways and limited access rooms.
- High speed Roller Doors Fitted to All factory Bays.
- In house Nitrogen generation

We project that carbon emissions will decrease over the next five years to 60.0 tCO₂e by 2030. This is a reduction of 7%

Progress against these targets can be seen in the graph below:

Graph to be added when More data becomes available

Carbon Reduction Projects

Completed Carbon Reduction Initiatives

First Baseline Report, Completed actions will be available on 2024-2025 Report

In the future we hope to implement further measures such as:

- Solar Power
- Electric Forklift
- In House Paint line (Reduced Transport)
- Company Awareness Information

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard¹ and uses the appropriate Government emission conversion factors for greenhouse gas company reporting².

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard³.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

Signed on behalf of the Supplier:

B. Hodges, Director.

Date: 23/04/24.
